Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

In exceptional circumstances, when a technical committee has collected data of a different kind from that which is normally published as an International Standard ("state of the art", for example), it may decide by a simple majority vote of its participating members to publish a Technical Report. A Technical Report is entirely informative in nature and does not have to be reviewed until the data it provides are considered to be no longer valid or useful.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/TR 20172 was prepared by the European Committee for Standardization (CEN) Technical Committee CEN/TC 121, *Welding*, in collaboration with Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 10, *Unification of requirements in the field of metal welding*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO/TR 20172:2006), which has been technically revised.

Introduction

This Technical Report reflects the situation in November 2007. Changes in European material standards will be taken into account in the next revision of this Technical Report.

Lists of former designations can be found in the relevant European materials standards.

For the materials not listed in this Technical Report, ISO/TR 20173:2005 and ISO/TR 20174:2005 are applicable.

Welding — Grouping systems for materials — European materials

1 Scope

This Technical Report establishes a European grouping system for materials for welding purposes, classified in accordance with the grouping system of ISO/TR 15608.

It is also applicable for other purposes such as heat treatment, forming and non-destructive testing.

This Technical Report covers grouping systems for the following standardized materials:

- a) steel;
- b) aluminium and its alloys;
- c) copper and its alloys;
- d) cast irons.

In case of dispute, for example where variations in properties such as thickness and yield strength occur, ISO/TR 15608 applies.

2 International grouping system for European materials

2.1 Types of steel in accordance with the grouping system of ISO/TR 15608:2005, Table 1

See Table 1.

List of ISO International Standards conforming to European standards

European standard given in Clause 2	Corresponding ISO International Standard	Title of the standard
EN 573-1	Under revision ISO/TC 79	<i>Aluminium and aluminium alloys — Chemical composition and form of wrought products — Part 1: Numerical designation system</i>
EN 573-2	—	<i>Aluminium and aluminium alloys — Chemical composition and form of wrought products — Part 2: Chemical symbol based designation system</i>
EN 573-3	ISO 209	<i>Aluminium and aluminium alloys — Chemical composition and form of wrought products — Part 3: Chemical composition and form of products</i>
EN 1412	—	<i>Copper and copper alloys — European numbering system</i>
EN 1560	Under revision ISO/TC 25	<i>Founding — Designation system for cast iron — Material symbols and material numbers</i>
EN 1561	—	<i>Founding — Grey cast irons</i>
EN 1562	—	<i>Founding — Malleable cast irons</i>
EN 1563	—	<i>Founding — Spheroidal graphite cast irons</i>
EN 1652	—	<i>Copper and copper alloys — Plate, sheet, strip and circles for general purposes</i>
EN 1653	—	<i>Copper and copper alloys — Plate, sheet and circles for boilers, pressure vessels and hot water storage units</i>
EN 1654	—	<i>Copper and copper alloys — Strip for springs and connectors</i>
EN 1706	ISO 3522	<i>Aluminium and aluminium alloys — Castings — Chemical composition and mechanical properties</i>
EN 1780-1	—	<i>Aluminium and aluminium alloys — Designation of alloyed aluminium ingots for remelting, master alloys and castings — Part 1: Numerical designation system</i>
EN 1780-2	—	<i>Aluminium and aluminium alloys — Designation of alloyed aluminium ingots for remelting, master alloys and castings — Part 2: Chemical symbol based designation system</i>
EN 10025-2	ISO 630	<i>Structural steels — Plates, wide flats, bars, sections and profiles</i>
—	ISO 1052	<i>Steels for general engineering purposes</i>
—	ISO 4995	<i>Hot-rolled steel sheet of structural quality</i>
—	ISO 6316	<i>Hot-rolled steel strip of structural quality</i>
—	ISO 13976	<i>Hot-rolled steel sheet in coils of structural quality and heavy thickness</i>
EN 10025-3	ISO 4950-1	<i>High yield strength flat steel products — Part 1: General requirements</i>
—	ISO 4950-2	<i>High yield strength flat steel products — Part 2: Products supplied in the normalized or controlled rolled condition</i>
—	ISO 4996	<i>Hot-rolled steel sheet of high yield stress structural quality</i>

European standard given in Clause 2	Corresponding ISO International Standard	Title of the standard
EN 10025-4	ISO 4950-1	<i>High yield strength flat steel products — Part 1: General requirements</i>
—	ISO 4950-2	<i>High yield strength flat steel products — Part 2: Products supplied in the normalized or controlled rolled condition</i>
—	ISO 4996	<i>Hot-rolled steel sheet of high yield stress structural quality</i>
EN 10025-5	ISO 4952	<i>Structural steels with improved atmospheric corrosion resistance</i>
—	ISO 5952	<i>Continuously hot-rolled steel sheet of structural quality with improved atmospheric corrosion resistance</i>
EN 10025-6	—	<i>Hot rolled products of structural steels — Part 6: Technical delivery conditions for flat products of high yield strength structural steels in the quenched and tempered condition</i>
EN 10028-2	ISO 9328-2	<i>Steel flat products for pressure purposes — Technical delivery conditions — Part 2: Non-alloy and alloy steels with specified elevated temperature properties</i>
EN 10028-3	ISO 9328-4	<i>Steel flat products for pressure purposes — Technical delivery conditions — Part 4: Nickel-alloy steels with specified low temperature properties</i>
EN 10028-4	ISO 9328-3	<i>Steel flat products for pressure purposes — Technical delivery conditions — Part 3: Weldable fine grain steels, normalized</i>
EN 10028-5	ISO 9328-4	<i>Steel flat products for pressure purposes — Technical delivery conditions — Part 4: Nickel-alloy steels with specified low temperature properties</i>
EN 10028-6	ISO 9328-4	<i>Steel flat products for pressure purposes — Technical delivery conditions — Part 4: Nickel-alloy steels with specified low temperature properties</i>
EN 10083-2	—	<i>Steels for quenching and tempering — Part 2: Technical delivery conditions for non alloy steels</i>
EN 10083-3	—	<i>Steels for quenching and tempering — Part 3: Technical delivery conditions for alloy steels</i>
EN 10085	—	<i>Nitriding steels — Technical delivery conditions</i>
EN 10088-1	—	<i>Stainless steels — Part 1: List of stainless steels</i>
EN 10120	ISO 4978	<i>Flat rolled steel products for welded gas cylinders</i>
EN 10132-2	—	<i>Cold rolled narrow steel strip for heat treatment — Technical delivery conditions — Part 2: Case hardening steels</i>
EN 10137-3	—	<i>Plates and wide flats made of high yield strength structural steels in the quenched and tempered or precipitation hardened conditions — Part 3: Delivery conditions for precipitation hardened steels</i>
EN 10149-2	ISO 6930-1	<i>High yield strength steel plates and wide flats for cold forming — Part 1: Delivery conditions for thermomechanically-rolled steels</i>
EN 10149-3	ISO 5951	<i>Hot-rolled steel sheet of higher yield strength with improved formability</i>

European standard given in Clause 2	Corresponding ISO International Standard	Title of the standard
EN 10164	—	<i>Steel products with improved deformation properties perpendicular to the surface of the product — Technical delivery conditions</i>
EN 10207	—	<i>Steels for simple pressure vessels — Technical delivery requirements for plates, strips and bars</i>
EN 10208-1	—	<i>Steel pipes for pipelines for combustible fluids — Technical delivery conditions — Part 1: Pipes of requirement class A</i>
EN 10208-2	—	<i>Steel pipes for pipelines for combustible fluids — Technical delivery conditions — Part 2: Pipes of requirement class B</i>
EN 10210-1	ISO 630-2	<i>Structural steels — Part 2: Technical delivery requirements for hot-finished hollow sections</i>
EN 10213	ISO 4991	<i>Steel castings for pressure purposes</i>
EN 10216-1	—	<i>Seamless steel tubes for pressure purposes — Technical delivery conditions — Part 1: Non-alloy steel tubes with specified room temperature properties</i>
EN 10216-2	—	<i>Seamless steel tubes for pressure purposes — Technical delivery conditions — Part 2: Non-alloy and alloy steel tubes with specified elevated temperature properties</i>
EN 10216-3	—	<i>Seamless steel tubes for pressure purposes — Technical delivery conditions — Part 3: Alloy fine grain steel tubes</i>
EN 10216-4	—	<i>Seamless steel tubes for pressure purposes — Technical delivery conditions — Part 4: Non-alloy and alloy steel tubes with specified low temperature properties</i>
EN 10216-5	—	<i>Seamless steel tubes for pressure purposes — Technical delivery conditions — Part 5: Stainless steel tubes</i>
EN 10217-1	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 1: Non-alloy steel tubes with specified room temperature properties</i>
EN 10217-2	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 2: Electric welded non-alloy and alloy steel tubes with specified elevated temperature properties</i>
EN 10217-3	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 3: Alloy fine grain steel tubes</i>
EN 10217-4	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 4: Electric welded non-alloy steel tubes with specified low temperature properties</i>
EN 10217-5	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 5: Submerged arc welded non-alloy and alloy steel tubes with specified elevated temperature properties</i>
EN 10217-6	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 6: Submerged arc welded non-alloy steel tubes with specified low temperature properties</i>
EN 10217-7	—	<i>Welded steel tubes for pressure purposes — Technical delivery conditions — Part 7: Stainless steel tubes</i>
