

Dynasty® 350 and 700

Issued October 2009 • Index No. AD/5.0

**TIG/Stick Welding
Power Source**

Quick Specs

Industrial Applications

Precision Fabrication
Heavy Fabrication
Pipe and Tube Fabrication
Aerospace
Aluminum Ship Repair
Anodized Aluminum Fabrication

Processes

TIG (GTAW)
Pulsed TIG (GTAW-P)
Stick (SMAW)
Air Carbon Arc (CAC-A)
350: 1/4 in maximum
700: 3/8 in maximum

Input Power 208–575 V, 3- or 1-Phase

Amperage Range **350:** 3–350 A
700: 5–700 A

Rated Output **350:** 300 A at 32 V, 60% Duty Cycle
700: 600 A at 44 V, 60% Duty Cycle

Weight **350:** 135.5 lb (61 kg)
700: 198 lb (90 kg)

The Power of Blue.®

Allows for any input voltage hookup (208–575 V) with no manual linking, providing convenience in any job setting. Ideal solution for dirty or unreliable power.

Meter Calibration allows meters to be calibrated for certification.

120 V auxiliary power receptacle for cooling system or small tools.

Wind Tunnel Technology™ protects internal electrical components from airborne contaminants, extending the product life.

Fan-On-Demand™ power source cooling system operates only when needed, reducing noise, energy use and the amount of contaminants pulled through the machine.

NEW! Blue Lightning™ — High Frequency Arc Starter for non-contact arc initiation. More consistent arc starts compared to traditional HF arc starters. Greater reliability and no maintenance on solid-state components. Preset parameters for tungsten sizes from .020 – 1/4 inch provide optimized starting for applications from thick to micro thin. For unique applications, custom settings are programmable.

Lift-Arc™ start provides AC or DC arc starting without the use of high frequency

Program memory features 9 independent program memories that maintain/save your parameters.

Auto-Postflow calculates the length of postflow time based on the amperage setting. This eliminates the need to independently set the postflow time for different amperages. This feature preserves your tungsten and prevents porosity.

Dynasty 350

Dynasty 700

Stick Features (AC/DC)

Tailored arc control (DIG) allows the arc characteristic to be changed for specific applications and electrodes. Smooth running 7018 or stiffer, more penetrating 6010.

Hot Start™ adaptive control provides positive arc starts without sticking.

AC frequency control adds additional stability when Stick welding in AC for smoother welds.

Power source is warranted for 3 years, parts and labor.
Original main power rectifier parts are warranted for 5 years.

AC TIG Features

Independent Amplitude/Amperage Control allows EP and EN amperages to be set independently to precisely control heat input to the work and electrode.

Extended AC balance (30–99%) controls the amount of oxide cleaning (amperage time in EN) which is essential for high quality welds on aluminum.

AC frequency (20–400 Hz) controls the width of the arc cone and the force of the arc.

AC Waveforms

Advance Squarewave, fast freezing puddle, deep penetration and fast travel speeds.

Soft Squarewave for a soft buttery arc with maximum puddle control and good wetting action.

Sine wave for customers that like a traditional arc. Quiet with good wetting.

Triangular wave reduces the heat input and is good on thin aluminum. Fast travel speeds.

DC TIG Features

Exceptionally smooth and precise arc for welding exotic materials.

High-Speed DC TIG Pulse Control Pulse frequency capable of pulsing 5000 pulses per second. Pulsing adds arc stability, reduces heat input and warpage and can increase travel speeds. Other parameters include peak amperage, peak time and background amperage.

TIG Upgrade Chart

Which Machine is Right for You?

Why Upgrade?	Syncrowave 350	UPGRADE	Dynasty 350	Dynasty 350 Benefits
Maximum Thickness Capacity	1/2 in Aluminum		5/8 in Aluminum	Increases aluminum thickness.
High Frequency Arc Starting	Continuous HF		Start Only	Start Only limits HF interference issues.
Frequency Control AC Output Control	Fixed at 60 Hz		Variable 20–400 Hz	Higher frequencies provide better arc control and faster travel speeds.
AC Waveforms	Soft Squarewave 		Advanced Squarewave  Sine Wave  Triangular Wave 	Advanced Squarewave=Travel faster Soft Squarewave= Maximum puddle control Sine Wave= Traditional characteristics Triangular Wave= Reduced heat input
Weld Aluminum with Pointed Tungsten				Waveshaping controls maintain the point. The benefits are: reduced heat input into your part, smaller weld beads, better starting and more control of the arc.
Portability	496 lb Manual Links 208/230/460 V Single-Phase		135 lb Auto-Line™ 208–575 V Single-Phase or Three-Phase	Easier to move because of size and weight. Auto-Line™ allows the unit to operate on any voltage. Single- or three-phase. Even generators!
Power Draw at 300 Amps	110 A at 230 V Single-Phase		32 A at 230 V Three-Phase	Power requirement to operate is much less. Smaller electrical service needed, smaller breaker/fuses and power cord.
Precise Controls	Some Digital Controls		All Digital Controls	Accuracy and repeatability with all digital controls.

AC Waveshape Controls

Feature	Waveform	Effect on Bead	Effect on Appearance
AC Balance Control Controls arc cleaning action. Adjusting the % EN of the AC wave controls the width of the etching zone surrounding the weld. <i>Note: Set the AC Balance control for adequate arc cleaning action at the sides and in front of the weld puddle. AC Balance should be fine tuned according to how heavy or thick the oxides are.</i>	51 – 99% EN 	Reduces balling action and helps maintain point Deep, narrow penetration	Narrow bead, with no visible cleaning No Visible Cleaning
	30 – 50% EN 	Increases balling action of the electrode Shallow penetration	Wider bead and cleaning action Cleaning
AC Frequency Control Controls the width of the arc cone. Increasing the AC Frequency provides a more focused arc with increased directional control. <i>Note: Decreasing the AC Frequency softens the arc and broadens the weld puddle for a wider weld bead.</i>	60 Cycles per Second 	Wider bead, good penetration — ideal for buildup work 	Wider bead and cleaning action Cleaning
	120 Cycles per Second 	Narrower bead for fillet welds and automated applications 	Narrower bead and cleaning action Cleaning
Independent AC Amperage Control Allows the EN and EP amperage values to be set independently. Adjusts the ratio of EN to EP amperage to precisely control heat input to the work and the electrode. EN amperage controls the level of penetration, while EP amperage dramatically effects the arc cleaning action along with the AC Balance control.		More current in EN than EP: Deeper penetration and faster travel speeds 	Narrow bead, with no visible cleaning No Visible Cleaning
		More current in EP than EN: Shallower penetration 	Wider bead and cleaning action Cleaning

AC Waveshape Controls (Continued)

AC Waveform Selection

Select from four different AC waveforms to optimize the arc characteristic for your application. Choose from:

ADVANCED SQUAREWAVE	SOFT SQUAREWAVE
 Fast transitions for responsive and dynamic arc.	 All the benefits of advanced square, fine tuned to provide a smooth, soft arc with maximum puddle control and good wetting action.
SINEWAVE	TRIANGULAR WAVE
 Square transitions eliminate the need for continuous HF, while the sinewave peaks soften the arc.	 Unconventional wave provides the punch of the peak amperage, while reducing overall heat input. Quick puddle formation reduces weld time — limiting heat input and reducing weld distortion, especially on thin materials.

Pulse TIG Controls

High Speed DC TIG-Pulse Controls

- **PPS Pulses per second (Hz):** DC = 0.1 – 5,000 PPS / AC = 0.1 – 500 PPS
- **% ON – % Peak Time:** 5 - 95% (Controls the amount of time during each pulse cycle at the PEAK amperage.)
- **Background Amps:** 5 – 99% (Sets the low-pulse amperage value as a % of the Peak Amps.)

CONVENTIONAL PULSED TIG	HIGH SPEED PULSED TIG
 Typically from 1 to 10 PPS. Provides a heating and cooling effect on the weld puddle and can reduce distortion by lowering the average amperage. This heating and cooling effect also produces a distinct ripple pattern in the weld bead. The relationship between pulse frequency and travel speed determines the distance between the ripples. Slow pulsing can also be coordinated with filler metal addition and can increase overall control of the weld puddle.	 In excess of 40 PPS, Pulsed TIG becomes more audible than visible — causing increased puddle agitation for a better as-welded microstructure. Pulsing the weld current at high speeds — between a high Peak and a low Background amperage — can also constrict and focus the arc. This results in maximum arc stability, increased penetration and increased travel speeds (Common Range: 100 – 500 PPS). The Arc-Sharpening effects of high speed pulsing are expanded to new dimensions. The ability to pulse at 5,000 PPS further enhances arc stability and concentration potential — which is extremely beneficial to automation where maximum travel speeds are required.

Packages and Torch Kits

Dynasty® Power Sources

Dynasty® 350 #907 204 (CSA)
(Auto-Line™ 208–575 VAC)

Dynasty® 350 #907 204-02-1 (CE)
(Auto-Line™ 380–575 VAC)

8 ft (2.4 m) primary cord, (2) international (Dinse 50) connectors, and CD-ROM Setup and Simulator.

Note: TIG torch adapter must be ordered separately.

Dynasty® 700 #907 101 (CSA)
(Auto-Line™ 208–575 VAC)

Dynasty® 700 #907 101-02-1 (CE)
(Auto-Line™ 380–575 VAC)

(2) thread lock weld cable connectors (#225 029), (1) water-cooled thread lock torch adapter (#225 028) for #18 or #20 torches, and CD-ROM Setup and Simulator.

Note: Primary cord and TIG torch must be ordered separately.

TIGRunner® Packages

Dynasty 350 TIGRunner® #907 204-01-1 (CSA)

Completely assembled.

Package includes:

- Dynasty® 350 (#907 204)
- RFCS-14 HD foot control
- Coolmate™ 3.5 Coolant System
- Cart with the following features: single cylinder rack, foot pedal holder, (3) cable/torch holders, (2) TIG electrode filler holders and a convenient drawer for tungsten and consumable storage

Note: Torch package and coolant must be ordered separately.

Dynasty 700 TIGRunner® #907 101-01-1 (CSA)

Completely assembled.

Package includes:

- Dynasty® 700 (#907 101)
- RFCS-14 HD foot control
- Coolmate™ 3.5 Coolant System
- Cart with the following features: single cylinder rack, foot pedal holder, (3) cable/torch holders, (2) TIG electrode filler holders and a convenient drawer for tungsten and consumable storage

Note: Torch package and coolant must be ordered separately.

Complete Packages

Dynasty 350 Complete #951 074 (CSA)

Completely assembled.

Package includes:

- Dynasty® TIGRunner® (#907 204-01-1)
- 25 ft (7.6 m) Weldcraft CS310 water-cooled torch
- Torch cable cover
- CS310AKC torch accessory kit includes shielding cups, collets, collet bodies, and 2% cerium tungsten electrodes (1/16, 3/32, and 1/8 in)
- Smith regulator/flowmeter HM2051A-580
- 12 ft (3.7 m) rubber gas hose (regulator to machine)
- Water-cooled Dinse torch adapter
- 15 ft (4.6 m) 1/0 weld lead with clamp (work or ground lead) and Dinse connector
- 4 gallons of pre-mixed low-conductivity coolant (#043 810)

Dynasty 700 Complete #951 075 (CSA)

Completely assembled.

Package includes:

- Dynasty® 700 TIGRunner (#907 101-01-1)
- 25 ft (7.6 m) Weldcraft WP18SC water-cooled torch
- Torch cable cover
- AK18C Torch Accessory Kit includes shielding cups, collets, collet bodies and 2% cerium tungsten electrodes (3/32, 1/8 and 5/32 in)
- Smith regulator/flowmeter H1954D-580
- 12 ft (3.7 m) rubber gas hose (regulator to machine)
- Water-cooled thread lock torch adapter
- 12 ft (3.7 m) 4/0 weld lead with clamp (work or ground lead)
- 4 gallons of pre-mixed low-conductivity coolant (#043 810)

Genuine Miller Accessories

Torch Kits

250 A Water-Cooled Torch Kit #300 185

- 25 ft (7.6 m) Weldcraft® WP20 torch
- Torch cable cover
- AK4C torch accessory kit includes shielding cups, collets, collet bodies and 2% cerium tungsten electrodes (1/16, 3/32 and 1/8 in)
- Smith® regulator/flowmeter HM2051A-580
- 12 ft (3.7 m) rubber gas hose (regulator to machine)
- Water-cooled Dinse torch adapter
- 15 ft (4.6 m) 1/0 weld lead with clamp (work or ground lead) and Dinse connector

300 A Water-Cooled Torch Kit #300 183 *Recommended for Dynasty 350*

- 25 ft (7.6 m) Weldcraft® CS310 torch
- Torch cable cover
- CS310AKC torch accessory kit includes shielding cups, collets, collet bodies and 2% cerium tungsten electrodes (1/16, 3/32 and 1/8 in)
- Smith® regulator/flowmeter HM2051A-580
- 12 ft (3.7 m) rubber gas hose (regulator to machine)
- Water-cooled Dinse torch adapter
- 15 ft (4.6 m) 1/0 weld lead with clamp (work or ground lead) and Dinse connector

400 A Water-Cooled Torch Kit #300 186 *Recommended for Dynasty 700*

- 25 ft (7.6 m) Weldcraft® WP18SC torch
- Torch cable cover
- AK18C torch accessory kit includes shielding cups, collets, collet bodies and 2% cerium tungsten electrodes (3/32, 1/8 and 5/32 in)
- Smith® regulator/flowmeter H1954D-580
- 12 ft (3.7 m) rubber gas hose (regulator to machine)
- Water-cooled thread lock torch adapters
- 12 ft (3.7 m) 4/0 weld lead with clamp (work or ground lead)

Runner Cart #300 244

Designed to accommodate the Dynasty® or Maxstar® 350 or 700 power sources and the Coolmate™ 3.5 Cooler. Cart features: single cylinder rack, foot pedal holder, (3) cable/torch

holders, (2) TIG electrode filler holders and a convenient drawer for tungsten and consumable storage.

Coolmate™ 3.5 #300 245

Designed to integrate with the Dynasty® and Maxstar® 350 and 700 power

sources. For use with water-cooled torches rated up to 600 amps. 3.5 gallon capacity.

TIG Coolant #043 810

Sold in multiples of 4. Pre-mixed low-conductivity Miller coolant contains ethylene glycol and deionized water to protect from freezing and boiling -37° to 227°F (-38° to 108°C). 1-gallon plastic recyclable bottles.

Water-Cooled Dinse #195 377 *For Dynasty and Maxstar® 350.*

Used to adapt WP20, WP18, and CS310 to dinse-style connector. *Order from Miller Parts.*

Water-Cooled Thread Lock #225 028

For Dynasty and Maxstar 700. Used with (WP125, WP24W, WP25, WP20, WP18, WP12, CS310, CS410, WP22, WP27)

water-cooled torch. *Order from Miller Parts.*

TIG Welding Gloves

- | | |
|-----------------|------------------|
| #227 813 Small | #227 815 Large |
| #227 814 Medium | #227 816 X-Large |
- Made from soft grain goatskin. Sewn with Kevlar® thread. *Order from Miller Parts.*

Automation Interface Kit #195 516

Field Includes automation PC board, 28-pin socket receptacle with harness, 28-pin plug connector. Provides required and advanced automation controls.

Weld Current Sensor #300 179

Detects when work clamp is not connected and prevents expensive damage to disconnect devices and input power cord and wiring.

Educational Materials

To order these items, distributors can call the Miller Literature Distribution Center at 1-920-735-4356, or FAX 1-920-735-4011.

Gas Tungsten Arc (TIG) Welding Book #170 555

CD-ROM #233 558

Simulator and setup video (included with machine).

Tungsten

Tungsten is 7 in length and available in pkgs of 10. Order from Miller Parts.

2% Ceriated (orange) for AC/DC applications

- #WC040X7 .040 in, 10–80 A
- #WC116X7 1/16 in, 70–150 A
- #WC332X7 3/32 in, 140–250 A
- #WC018X7 1/8 in, 225–400 A
- #WC532X7 5/32 in, 300–500 A

1.5% Lanthanum (gold) for AC/DC applications

- #WL040X7 .040 in, 10–80 A
- #WL116X7 1/16 in, 70–150 A
- #WL332X7 3/32 in, 140–250 A
- #WL018X7 1/8 in, 225–400 A
- #WL532X7 5/32 in, 300–500 A

Remote Controls and Switches

RCCS-14 Remote Contactor and Current Control #043 688

14-pin plug. North/south rotary-motion fingertip control fastens to TIG torch using two Velcro® straps. Includes 26.5 ft (8 m) control cord.

RFCS-14 HD Foot Control #194 744

Maximum flexibility is accomplished with a reconfigurable cord that

can exit the front, back or either side of the pedal. Foot pedal provides remote current and contactor control. Includes 20 ft (6 m) cord and 14-pin plug.

RHC-14 Hand Control #129 340

Miniature hand control for remote current and contactor control. Dimensions: 4 x 4 x 3-1/4 in (102 x 102 x 83 mm). Includes 20 ft (6 m) cord and 14-pin plug.

RMLS-14 Switch #129 337

Momentary- and maintained-contact rocker switch for contactor control. Push forward for maintained contact and backward for momentary contact. Includes 26.5 ft (8 m) cord and 14-pin plug.

RMS-14 On/Off Control #187 208

Momentary-contact switch for contactor control. Rubber-covered pushbutton dome switch ideal for repetitive on-off applications. Includes 26.5 ft (8 m) cord and 14-pin plug.

Extension Cords for 14-Pin Remote Controls

- #122 973 25 ft (7.6 m)
- #122 974 50 ft (15.2 m)
- #122 975 75 ft (23 m)
